PATENT P56577

IN THE CLAIMS

Please cancel claims 1 thru 6 without prejudice or disclaimer, and amend claims 7, 9, 12 and 14, as follows:

Claims 1-6. (Canceled)

7. (Currently Amended) A method of changing a channel in a digital TV for use in a home wide web, the method comprising the steps of:

producing a channel selection page to change a current channel when a user requests a change of the current channel to a user input channel;

producing and storing a first cookie for the channel selection page;

changing information of the channel selection page by using a channel up/down key of a remote controller so as to change the current channel to the user input channel;

producing and storing a second cookie for the changed information of the channel selection page; and

changing the current channel to the user input channel by means of channel information contained in the second cookie, whereby a broadcast of the user input channel is displayed without displaying the channel selection page.

- 8. (Original) The method of claim 7, wherein the channel information contained in the second cookie is determined by searching a string contained in the second cookie.
 - 9. (Currently Amended) A method of changing a channel in a digital TV for use

PATENT P56577

in a	home wi	de web,	the method	comprising	the steps of:
------	---------	---------	------------	------------	---------------

producing a channel selection page to change a current channel when a user requests a change of the current channel to a user input channel;

extracting channel information from the channel selection page and storing the extracted channel information in the form of a file;

changing the channel information stored in the form of a file in response to an operation of a channel up/down key of a remote controller by the user; and

changing the current channel to the user input channel by means of the changed channel information, whereby a broadcast of the user input channel is displayed without displaying the channel selection page.

- 10. (Original) The method of claim 9, wherein, when the user manipulates a direction key to select the user input channel, a value of the current channel is changed by as much as "1".
- 11. (Original) The method of claim 9, wherein, when the user manipulates a digit key to select the user input channel, the step of changing the channel information stored in the form of a file comprises:

producing a channel selection page corresponding to an input digit;

extracting channel information from the produced channel selection page and calculating a difference value between a value of the extracted channel information and a value of the channel information stored in the form of a file; and

changing the channel information stored in the form of a file by as much as the

difference value

1	12. (Currently Amended) A digital TV for use in a home wide web, comprising:
2	user input means for inputting a request by a user for change of a current channel;
3	means for producing a channel selection page to change the current channel when
4	the user requests the change of the current channel to a user input channel;
5	means for producing and storing a first cookie for the channel selection page;
6	remote controller means including a channel up/down key for changing
7	information of the channel selection page so as to change the current channel to the user
8	input channel;
9	means for producing and storing a second cookie for the changed information of
10	the channel selection page; and
11	means for changing the current channel to the user input channel by means of
12	channel information contained in the second cookie, whereby a broadcast of the user
13	input channel is displayed without displaying the channel selection page.

- 13. (Original) The digital TV of claim 12, wherein the channel information contained in the second cookie is determined by searching a string contained in the second cookie.
- 14. (Currently Amended) A digital TV for use in a home wide web, comprising: user input means for inputting a request by a user for change of a current channel; means for producing a channel selection page to change the current channel when

- the user requests the change of the current channel to a user input channel; 4
- means for extracting channel information from the channel selection page; 5
- means for storing the extracted channel information in the form of a file; 6
- remote controller means including a channel up/down key for changing the 7 channel information stored in the form of a file in response to an operation by the user; 9 and

ROBERT E BUSHNELL

- means for changing the current channel to the user input channel by means of the changed channel information, whereby a broadcast of the user input channel is displayed without displaying the channel selection page.
- 1 15. (Original) The method of claim 14, wherein, when the user manipulates a 2 direction key to select the user input channel, a value of the current channel is changed by 3 as much as "1".
 - 16. (Original) The method of claim 14, wherein, when the user manipulates a digit key to select the user input channel, the means for changing the channel information stored in the form of a file produces a channel selection page corresponding to an input digit, extracts channel information from the produced channel selection page, calculates a difference value between a value of the extracted channel information and a value of the channel information stored in the form of a file, and changes the channel information stored in the form of a file by as much as the difference value.
 - 17. (Previously Presented) The method of claim 7, wherein the first and second
